

## Marine Safeguard

By some accounts, marine piracy began over 2000 years ago in Ancient Greece. In a familiar style, pirates would capture other ships to steal valuable cargo, often retaining the ship for themselves. It is one of the oldest crimes in the world and its impact still reverberates today.

At Samphire Risk, our common goal is to protect our clients from 'bad people doing bad things'. We have witnessed first-hand the devastating impact that marine piracy can have on maritime operators, their employees, contractors and their families.

Hostile actions can overwhelm the most competent business owners and managers. What gives them peace of mind is the knowledge that they can call on true expertise in their moment of need, look their people in the eye and say "We did everything we could". Samphire's simple commitment is to deliver this expertise through insurance and world class crisis response.
